

Matt Zhang

Tufts Post-Bac Computer Science
Student

Hi there! I'm Chenyuan (Matt) Zhang, currently a Post-Bac Computer Science student at [Tufts University](#). I am mainly interested about [AI safety](#) and always passionate about how can we build human-like or even super intelligence that can positively contribute to the society. In the future, I will continue thinking about these 2 problems and actively finding solutions to them.

Before that, I was a crazy gamer with a focus on 2 games: [Legends of the Three Kingdoms](#) (a kind of card game) and [CFHD](#) (a kind of first-person shooting game), in both of which I am near the top 1% level.

I obtained my B.S. in Clinical Medicine from [Zhejiang Chinese Medical University](#).
